

Electric Vehicles

Challenges and the Future

The Past

- “Old” Golden Era
1880’s to 1910’s
- ~40% of cars on the
road are electric in
1910

Resurgence

Oil crisis of the 1970's jumpstarts the call for fuel efficiency and alternatives to gas.

Today

Almost all the major car manufacturers have a Plug in EV or will in the next decade.

Outsiders

Challenges

- Hydrogen
- Battery Tech
- Power Infrastructure
- American Car Culture
- Cities
- Sharing Economy

The Future

"The future is a riddle only time can solve."
- The Riddler
